Product Bulletin #	16-0002
Revised	January 29, 2016
Product Affected	FlexIP
Purpose	Notice that the FlexIP's capacity for maximum Modules, Users, and Partitions has been increased to match the system capacities of the iBase panel when using FlexIP firmware version 0A.15 or greater.

CONTENTS

Overview

The latest FlexIP firmware version 0A.15 increases the systems maximum module and partition capacity to 16 of each, and the User capacity is increased to 20,000. Refer **Table 1** for more details.

Table 1: FlexIP Capacity Increased in 0A.15

Property	Previously	New (matches iBase)
Max Users	10,000	20,000
Partitions	8	16
Audio-8 Pro/ Audio-8 Modules	8	16
I/O Expansion Modules	8	16
Keypads	8	16
Power Hubs	8	16
Access-4 Pro / Access-4 Modules	4	16

Upgrade Existing Installations to 0A.15

The new firmware can be installed on any FlexIP panel, automatically increasing the system's capacity. This means if an existing FlexIP panel was at maximum module capacity then additional modules may be added by simply updating the system firmware, instead of installing an additional control panel at the same facility.

Compatibility Details
